SOUTH EAST ASIA'S LARGEST COMMERCIAL VEHICLE EXHIBITION

20 - 22 JUNE 2019, MINES CONVENTION CENTRE

MINES International Exhibition & Convention Centre (MIECC) Sri Kembangan, Selangor, Malaysia

T H U L T I M A T D E L O A D E

When you want the ultimate sideloader, there is only one choice- HAMMAR.

It can load and cart a 20', 2x20's, a 40', or even a jumbo 45' container in minutes at the push of a button.

Make HAMMAR your ultimate choice.

- Lightest tare weight in the world! From 2,000Kgs to 3,000Kgs lighter than the competition. Fuel savings with every kilometer covered!
- 1 tonne to 36 tonnes payload, same cycle time of 3.5 mins! Does not slow down when payload increases.
- 100% Spares always in stock.
- 24hrs back-up service, 365 days all year round.
- PTO or 84Hp Engine Power Pack options

YB Dato' Kamarudin Jaffar Deputy Minister of Transport

MINISTRY OF TRANSPORT'S WELCOME NOTE FOR THE MALAYSIA COMMERCIAL VEHICLE EXPO 2019

Representing the Ministry of Transport, and by extension the Malaysian government, I bid you a warm welcome to this fourth instalment of the Malaysia Commercial Vehicle Expo (MCVE). It is with great pleasure that our ministry is being part of this event as it ties in with the vision of the ministry to be spearheading the transformation of an integrated, efficient and safe transportation system. With the theme of "The Future of Transportation in Malaysia", this exhibition is a showcase of what we try to achieve in the years to come and I am grateful for the exhibitors that they have taken this to heart, showing what can be done to push this agenda forward. As it has been repeated in the news many times, Malaysia is going through a phase of change with a new government and we are playing our part to improve things.

I would also like to congratulate the organisers, Asian Trucker, for having made this event a highly successful one. We can be proud of the fact that it is our country, Malaysia, that is the host to the largest commercial vehicle exhibition in South East Asia. This is a clear testament to the importance that road transport plays in Malaysia and the region. We are a transit country as well as one with a high demand for domestic transport. The solutions presented here during the next three days are valuable contributions towards making transportation safer, more efficient and in the case of passenger transport, more convenient. I do hope that delegates will take away new ideas, thoughts and contacts from this exhibition.

In Malaysia, transporters and the government are faced with both, opportunities and challenges that modern logistics requirements bring with them. It is therefore encouraging to see that many of the exhibitors at MCVE 2019 are presenting solutions that will help to address these. The concepts of the last mile transport and e-commerce have spurred developments but are also requiring us to re-think processes, legislation and the way we work. In order to stay competitive, all of us will have to embrace new technologies. I hope that the exhibits and showcases here at the MCVE 2019 will be suitable to be implemented in your operation, thus improving your businesses. I am certainly looking forward to not only seeing these innovations here at the show first-hand, but to spot them on the roads.

On behalf of the Ministry of Transport, I wish you all a successful visit to the Malaysia Commercial Vehicle Expo 2019 and I hope to receive your input on how we can grow Malaysia's transportation system and network together.

Thank you YB Dato' Kamarudin Jaffar Deputy Minister of Transport

EASY TO CLEAN • HAIL RESISTANT • LOW THERMAL EXPANSION COEFFICIENT • LIGHT • HIGH ELASTICITY • WATERPROOF • STRONG CORROSION RESISTANT • DURABLE

Brianza Plastica's **ELYCOLD** and **ELYPLAN** fiberglass rolls and sheets are the ideal solution for the construction of panels for industrial, commercial, temperature controlled, recreational and public transport vehicles.

The excellent resistance and dimensional strength, combined with lightness and easy workability, make them perfect for the construction of walls, anti-hail roofs, floors and interior coverings.

ASIAN TRUCKER WELCOMES YOU TO THE MALAYSIA COMMERCIAL VEHICLE EXPO 2019

Dear Ladies and Gentlemen,

Today we welcome you to the fourth instalment of our exhibition. On behalf of the Asian Trucker Media team I wish you a warm welcome and thank you for your participation in this event. MCVE 2019 is now the largest exhibition in South East Asia dedicated to commercial vehicles, showcasing the top brands in the industry. We hope the event is informative and that you will find the products and services you are looking for. I trust our team has developed a concept that is in line with market trends and addresses the needs of the transport industry.

Seeing a shift in the way business is conducted, we have given this year's exhibition the theme of "The Future of Transportation in Malaysia". The messages we are receiving from the market, makers of trucks and buses as well as the government is that there are major changes coming. While we cannot predict which exact source it will be, alternative fuels are a hot topic. Automation continues to be one subject that everyone is concerned with. In addition, cross border transportation, local infrastructure projects, the push to attract more tourists and other initiatives remain drivers of development for all parties. Several of our exhibitors are showcasing their latest products, addressing the changing needs in this exciting time.

Road safety is one topic that is very close to us and we are working with various parties to do our part in reducing the number of accidents and road fatalities. Key to that are the drivers of commercial vehicles on the road. They may be called captains, pilots or simply drivers, but their role in this is highly important. Understanding how commercial vehicles work is the first step to improving road safety. For this reason, we have created the Asian Trucker Drivers Club and many of our members will attend MCVE to grow their knowledge. We hope we can celebrate these individuals, as, without them, there would be no movement on the road.

Delegates can look forward to a well-rounded fringe programme. Networking opportunities are a very important aspect of the Malaysia Commercial Vehicle Exhibition and there are several such spots where we encourage the exchange of thoughts and the fostering of business relationships. Seminars by Volvo Trucks and Hengst are happening throughout the show that promise to update delegates on new trends and ideas. Several thought leaders have taken the opportunity to present their papers, products and thinking. Again, the Scania Driver Competition, MCVE Edition, will put your skills to the test. As a new component we are introducing the "Hour of Power". Several exhibitors have been given a time slot during which they can put on an exciting show where "almost anything goes".

This event would not be possible without the many contributors. Firstly, many exhibitors continue to use the expo as a platform to promote their brands. Sponsors have generously contributed, and we would like to acknowledge their support. Furthermore, government agencies have lent a hand and are supporting the Malaysia Commercial Vehicle Expo 2019. Asian Trucker is very grateful for this. Playing a crucial role, too, are our media partners and other supporters that have contributed with their services.

On behalf of Asian Trucker Media and all our team members, we hope you have an eventful, successful and rewarding visit to our exhibition, The Malaysia Commercial Vehicle Expo 2019.

We thank you and look forward to seeing your version of the Future of Transportation in Malaysia

Stefan Pertz

Editor, Asian Trucker and Asian Buses Organiser, Malaysia Commercial Vehicle Expo 2019

GUARDIAN

REAL-TIME DRIVER FATIGUE AND DISTRACTION ACCIDENT PREVENTION TECHNOLOGY

Guardian by Seeing Machines uses sophisticated eye & face tracking algorithms to detect when you're fatigued or distracted behind the wheel and provides immediate in-cab alerts to prevent an accident from occurring.

- 24/7 protection for you and your passengers on the road
- Alerts you of signs of fatigue before an accident occurs
- Allows management to minimise risk and improve working conditions
- Ensures a safer workplace to get you home safely

Guardian is not a CCTV and respects your privacy.

HOW IT WORKS

Driver has a fatigue or distraction event In-cab sensor detects the event Driver is given an audio alert or seat vibration

Driver alerted

Asian Trucker Media provides a full range of communications channels for the commercial vehicle industry. Our platforms are aimed primarily at fleet operators and driver-owners in South East Asia. Our print magazine, Asian Trucker, is a premier business and product magazine and features issues concerning drivers through to logistics and infrastructure executives. We publish four editions: Malaysia (Eng), Singapore (Eng), Thailand (Thai) and Asian Buses (Eng). In addition, we host seminars, publish E-Newsletters, provide advertising possibilities via websites and organise and manage South East Asia's largest commercial vehicle exhibition.

Asian Trucker Malaysia has been published since 2009. In December we will celebrate 50 issues of the Malaysian magazine. The Singapore edition of the magazine has been published 26 times over the past seven years with Thailand being active for over six years and 23 issues so far. To round things off, an annual Trailer Special is published in Malaysia.

Addressing the needs of this market, we added the Bus magazine in 2014 which we have published 20 times. Initially, this publication was called "Asian Trucker Bus Special". However, in January 2015 we have renamed it to make it a stand-alone publication.

Also added in 2014 was the Asian Trucker Drivers Club, which is a non-for-profit component of our business. Here we seek to enhance the skills and the social standing of truck drivers. This initiative is funded mainly through sponsorships and has seen several hundred drivers join in the first year of its existence.

Asian Trucker Media is an independent company, established in Malaysia and being the holding company for Asian Trucker Singapore and Asian Trucker Thailand.

Asian Trucker is the only regional and cross-country magazine of this kind. Many companies keep complete collections of the magazine as reference libraries.

Our exhibition, MCVE, is currently the largest exhibition in South East Asia dedicated to the commercial vehicle industry and it is going to be the fourth instalment in June 2019.

Supports smart and safe reversing, keeping a close eye on blind spots.

Reversing commercial vehicles is a daily challenge. The area directly behind the trailer remains a key blind spot to drivers, who have to take any movement around their vehicle into account at all times.

WABCO TailGUARDTM helps to avoid accidents as well as damage to trailers. Ultrasonic sensors detect if the area behind the trailer is safe, and TailGUARDTM brakes the vehicle automatically at a pre-set distance between 50 and 200 cm from an object in the rear blind spot. Directly resulting in new levels of safety for drivers and fleets.

Improved safety, less damage

- Supports safe reversing
- Reduces the number of potential accidents when reversing
- Helps to avoid costly vehicle damage and downtime

The rear blind spot detection system that automatically stops the vehicle

- Rear blind spot detection system for commercial vehicles
- Automatically activates when the driver shifts into reverse
- ✓ Up to six ultrasonic sensors measure the distance to objects behind the vehicle
- Automatically brakes when the vehicle approaches objects within a pre-programmed distance between 50 and 200 cm
- ✓ For vehicles equipped with ABS or EBS, active braking and distance indication is visible on the WABCO Trailer Remote Control
- Warns the driver with a pulsating brake pedal when exceeding a speed of 9 km/h
- Available for both trucks (with ABS and EBS) and trailers (with EBS)

TailGUARD™ helps to avoid accidents as well as damage to trailers or loading docks.

JABATAN KESELAMATAN JALAN RAYA MALAYSIA (JKJR)

Suite 2B-15, Blok 2B, Aras 15 Plaza Sentral, Jalan Stesen Sentral 550470 Kuala Lumpur

Tel: +603-27735735 Website: www.jkjr.gov.my

Background

JKJR was established on 15 September 2004 as a leader in road safety advocacy to increase the awareness of road users on the importance of road safety and ultimately reduce deaths and injuries caused by road traffic crashes. JKJR is also the Secretariat to the Road Safety Council of Malaysia (NGO).

Vision

"Zero Fatality due to road accidents"

The philosophy behind this is that we accept that road users can and will make mistakes on the road but it should not cause death or serious injuries.

Mission

To make Malaysia on par with developed nations in terms of road safety by 2020 with the fatality index of 2 deaths per 10,000 registered vehicles in line with the United Nations Global Decade of Action for Road Safety 2011-2020.

Objective

It's an agency responsible for advocacy programs and road safety education

Role And Function

Plan, formulate, implement and coordinate road safety policies/plan/regulations.

Coordinate road safety programmes involving other agencies; and Coordinate and implement road safety campaigns at national level to educate road users.

JABATAN PENGANGKUTAN JALAN (JPJ)

Aras 4, No.26, Jalan Tun Hussein, Persiaran Perdana, Presint 4. Pusat Pentadbiran Kerajaan Persekutuan. 62100 PUTRAJAYA

Website: www.jpj.gov.my

VISION

To Become a World Class Road Transport Enforcement Management Organization World Class by 2020.

MISSION

To regulate motor vehicles and road traffic safely and efficiently through efficient, reputable and high technology enforcement and service deliveries to meet the nation and customer needs, and to ensure the welfare and professional growth of JPJ citizens.

OBJECTIVES

- To establish and regulate the registration and licensing of motor vehicles in a systematic, reliable and innovative manner.
- Establish and administer the road transport law with the commitment to produce competent, law abiding and prudent drivers of motor vehicles.
- To enforce and administer the road transport law with integrity and commitment to create a society that has a culture of adherence to the rules of the road.
- To monitor and administer motor vehicle safety standards with efficiency and integrity to meet the needs of the environment and the country's automotive industry.

Email: nbgindustries@gmail.com Website: www.FAW.com.cn Facebook: FAW Trucks Malaysia

BG Industries Sdn. Bhd., or better known as the famous Ngu Brothers Group hails from Sibu and has been a dominant player in the Commercial Vehicles industry for decades. NBG Industries was incorporated on the 2nd July 2013 for the Manufacturing and Assembly of Motor Vehicles. In recognising the well-established brand of FAW Jiefang in China, NBG acquired the sole distributorship and also became the official assembler of FAW trucks for Malaysia.

NBG offers various models of FAW Commercial Vehicles, ranging from 7.5 tonnes GVW to over 70 tonnes GCW. The models available are multi cargo rigid trucks, Prime Movers, Mixer and Tipper chassis.

NBG is located in Kampung Baru Subang. The new 3S facility houses an even more generous supply of spare parts and after sales support to enhance the brand name of FAW and customer's confidence.

SIPHONBLOCK AFT ENTERPRISE

28-2 Jalan Ara SD 7/3B Bandar Sri Damansara 52200 Kuala Lumpur

> Mobile: +6019 553 9195 Email: graham@siphonblock.com

SIPHONBLOCK

■ Siphonblock AFT offer Fuel security devices that stops petty fuel theft from a trucks fuel tank. Most truck fuel tanks contain 400 litres and with the current fuel price a tank of fuel is worth almost RM900.

It's rare though to experience a full tank being taken – most theft is small but regular if a tank is not protected. It's called 'skimming' - just enough to be worthwhile but not enough to raise suspicion.

Even with a GPS system, the fuel sensor may only be 95% accurate and so on a 400 litre fuel tank, almost 20 litres can be removed without the system picking up this loss.

If you have a GPS system, why accept a report that says fuel has been stolen? Fit a Siphonblock device to stop that petty theft!

If you do not have a GPS system, we would suggest getting in touch with us ASAP! Delivery times are just 14-21 days.'

Tel: +603-5510 3300

Mobile: +6012-373 1030 / +6019-240 1030 Email: info.volvotrucksMY@volvo.com

Volvo Trucks is part of the larger Volvo Group, which also manufacturers construction equipment, marine and industrial engines, and provides financial solutions and services for the same. We are one of the world's largest truck manufacturers which supply the haulage and logistics industry amongst many others with complete transportation solutions. Globally the Volvo Group employs about 100,000 people including over 400 staff in Malaysia.

Volvo Trucks was established in Malaysia in 1969 and now operates under Volvo Malaysia Sdn Bhd. Our customers are supported by 13 network points across Peninsula Malaysia and East Malaysia for easy access to sales, parts and round-the-clock after-market support. Our bestselling trucks are the Volvo FM, Volvo FMX and the Volvo FH due to its track record in safety, durability and reliability. Volvo trucks have the highest level of advance drive

technologies, safety innovations, power and flexibility in transport efficiency for a wide range of industry ranging from logistics to mining and forestry. These features have today, made us the leading brand in the European Heavy Duty segment in Malaysia.

Volvo Trucks commitment to three core values, namely Safety, Quality and Environmental Care are continuously reflected in all aspects of its product innovations and customer care. Since 2013, we have been a recipient of awards from the annually held 'Truck of The Year' event held by New Straits Time. In 2015, the Volvo FM series won the NST Petronas Urania Prime Mover of the Year in the 3-axle category.

This year, we will be celebrating our 50th Year Anniversary in Malaysia.

SPECIAL OFFER FROM ASIAN TRUCKER!

Books dedicated to wheel alignment, more so on wheel alignment for commercial vehicles, are very rare indeed. You will not find them in bookstores. Wong Thiam Boon has poured decades worth of experience into this book and you can now buy it from Asian Trucker for a special price.

If you want to learn more about how to reduce the cost of operating your fleet through correct wheel alignment, then wait no longer and grab a copy of this practical guide book.

USP: RM 120.00

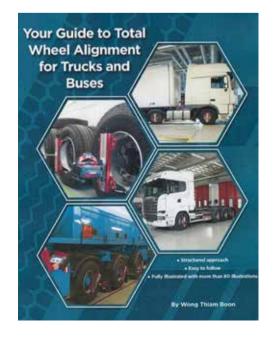

Special offer from Asian Trucker: RM 100.00 (During MCVE)

"This practical and resourceful book will be an asset to any fleet operator or workshop that wants to improve the performance of commercial vehicles. It is TB Wong's experience of decades working with wheel alignment systems that shines through and makes this a must-have item for anyone that is serious about their transportation business. The industry had to wait far to long for a resource like this and I am excited to see TB Wong's knowledge now being available to the market."

Stefan Pertz, Editor, Asian Trucker Malaysia Editor, Asian Buses
